Artist Statement

Creating art is a form of meditation that allows me to be totally in the present. At the core of my works I am searching for ways to express interaction between mankind and the natural world. I want to breathe life into invisible dreams by using unique shapes and forms. I approach each work from a place of emptiness, and am open to what comes in. Creating a dialogue with the painting allows me to be surprised.

Background

A professional interior designer for 20 years, Lisa also has studied media arts and photography, and regularly exhibits her work regionally and nationally.
